

yellowpop

Our Product

We are specialised in LED neon signs, also called neon flex. Our products are 100% handcrafted locally in our factories partners in Shenzhen and Shanghai (China). We are proud of our relationship with our family size factories that allocate a major part of their capacity of production for us which allow reactivity and remarkable quality control.

The product itself is quite simple, a backing of acrylic transparent (or not) on which we glue tube of LED following the exact design of each of our signs. We can create any shape, any sizes and have a various colours available.

We sell our own collection online or offer an online custom builder for people to express their creativity.

Our

Story

yellowpop was created from our fear of white walls and sad spaces.

We wanted to find a simple way to fill an empty room with joy and warmth.

Our inspiration came from where people are happiest – outside, soaking up the sunshine. So we found a way to replicate the glow and energy that comes from a day spent in the sun (minus the vitamin D), and that’s when yellowpop was born.

Whether it’s day or night, whether you’re at home, the office or an event, you can flip on one of our neons and watch the space around it glow. And if you look around, you’ll see the faces of those who look at the neon glow as well – both literally and figuratively.

Neons have a way of bringing immediate joy to everyone around them, thanks to their warm glow and upbeat vibes.

Seeing that glow is what keeps us excited to grow and innovate on our product offerings.

So whether you choose a neon from our collection, a limited-edition piece from a renowned artist or a custom design, yellowpop pieces are guaranteed to add a pop of positive vibes to any space.

We can’t wait to see what you’ll create next.

Ruben & Jeremy

What's the deal with LED?

Like the neon that you probably have in mind, (you know the one that costs a fortune, breaks and takes two professionals to install?). Our signs are unbreakable, as easy as a painting to install wherever you like in your space.

Impact Resistant

Our signs are made out of PVC or Silicon which make them indestructible

Dimmable

Change the intensity of the light with a remote to fit the mood.

Feel Cool

95% of the energy in LEDs is converted into light and only 5% as heat

Easy Installation

Hang it like a painting plug it like a lamp

Indoor & Outdoor

We can make neon sign 100% waterproof

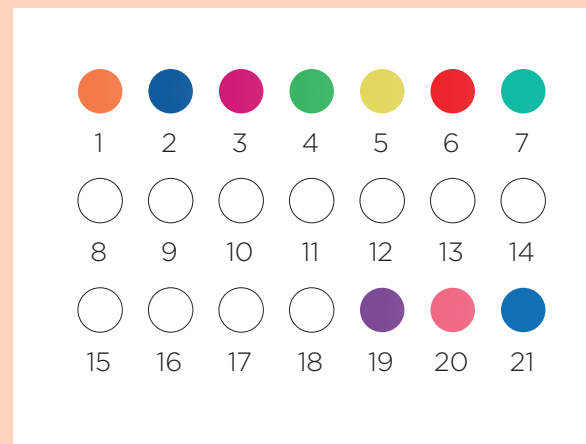

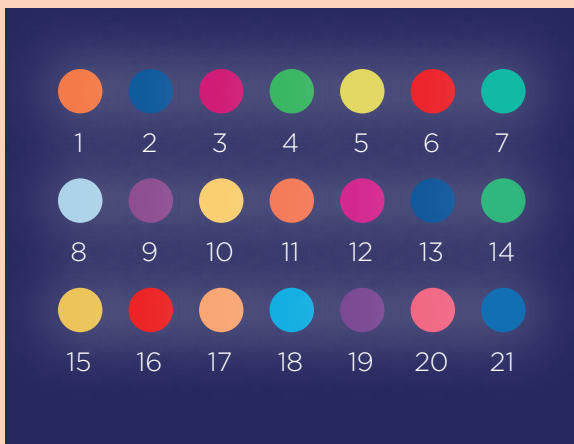

Energy Efficient

LED Neon Flex is 80% more efficient than traditional lighting.

Ok, tell me more!

Colours

We offer a limited number of colours split in two categories. White jacket (the tube will be white when the sign is off and coloured jacket the sign will be coloured when the sign is off

- 1 - orange and jacket orange
- 2 - blue and jacket blue
- 3 - pink and jacket pink
- 4 - green and jacket green
- 5 - yellow and jacket yellow
- 6 - red and jacket red
- 7 - iced blue and jacket green

- 8 - white
- 9 - purple and jacket white
- 10 - warm white
- 11 - orange and jacket white
- 12 - pink and jacket white
- 13 - blue and jacket white
- 14 - green and jacket white

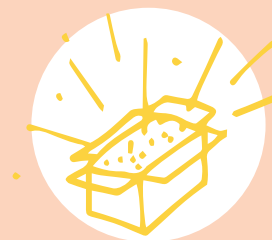

- 15 - yellow and jacket white
- 16 - red and jacket white
- 17 - girl pink and and jacket white
- 18 - iced bleu and jacket white
- 19 - purple and jacket purple
- 20 - girl pink and jacket pink
- 21 - blue and jacket sky blue
